MASAR Health Center (MASAR PHC) contributes a sustainable vision for healthcare in Northwest Syria (NWS)

Through ongoing effort to strengthen health services in NWS, MASAR PHC center in Jindires city in Western Aleppo, Syria. Providing integrated and comprehensive care to affected communities. During the second half of 2023, the center made remarkable achievements in providing medical and Psychosocial services to the affected people by recent earthquake and people of the areas.

Medical Services and Healthcare:

MASAR PHC center is considered a turning point in the provision of health services, as it provides a variety of services. This includes specialized medical consultations, primary health care, emergency case management, and medical referrals for cases requiring specialized care. In addition to providing medications supported by World Health Organization (WHO).

Psychosocial services:

In addition to medical care, the center provides integrated Psychosocial and social services. This includes a dedicated public protection room to provide psychosocial support to adults and children suffering from the Psychosocial effects of emergency context, including victims of recent earthquakes.

Mobile clinic & geographical distributions:

In the context of expanding the reach out, the center is successfully working to provide healthcare in six different areas in NWS. The center's mobile clinic plays a vital role in reaching random camps and providing medical services and consultations. It also includes a protection team that works to provide moral and Psychosocial support (PSS) to patients.

Private Protection Room:

The protection room is an essential part of the center's facilities, it provides a safe environment to provide Psychosocial support (PSS) to individual and groups therapy and can deal with Psychosocial challenges that individuals who survive emergency context may face.

Workload statistics:

Up to end of 2023, the total number consultations reached 35,255, including 10,093 children, who benefited from health and mental care services. These statistics reflect the positive impact achieved by the center in meeting the health and Psychosocial needs of the community.

Prospective Impact:

These notable achievements reflect the center's commitment to providing integrated health and social care and indicate the humanitarian organization's aspirations towards expanding care and improving the services provided. MASAR HD continues working hard to ensure comprehensive care for people in need in NWS.
